

M101GLD

50th Anniversary Edition Phase 90

Five decades ago, the Phase 90 launched one of the most iconic music effects companies and established itself as the pedal by which all other phasers are judged. The MXR 50th Anniversary Phase 90 celebrates that legacy with a special edition finish—it's worthy of a privileged place in your finest display case, but it'll fit perfectly on your pedalboard, too.

jimdunlop.com/m101gld

External Controls

- 1 FOOTSWITCH toggles effect on/bypass (red LED indicates on)
- 2 SPEED knob controls overall effect rate

Basic Operation

Power

The MXR® Phase 90 is powered by one 9-volt battery (remove bottom plate to install), the Dunlop ECB003 9-volt adapter, or an MXR Brick™ Series power supply.

Directions

1. Run a cable from your guitar to the M101GLD's INPUT jack and run another cable from the M101GLD's OUTPUT jack to your amplifier.
2. Start with the SPEED control at 12 o'clock.
3. Turn the effect on by depressing the footswitch.
4. Rotate the SPEED knob clockwise for a faster phase effect or counterclockwise for a slower phase effect.

Specifications

Input Impedance	1M Ω
Output Impedance	10 Ω
Nominal Input Level	-20 dBV
Nominal Output Level	-20 dBV
Noise Floor*	-97 dBV
Bypass	True Hardwire
Current Draw	5 mA
Power Supply	9 volts DC

* A-weighted
