M69P PRIME DISTORTION

M69P PRIME DISTORTION

DESCRIPTION

- Big '80s arena rock sound
- Raw, punchy sustain
- Dial up classic, ripping to in seconds

POWER

The MXR Prime Distortion is powered by one 9 volt battery (remove bottom plate to install), a 9 volt AC Adapter such as the Dunlop ECB003/ECB003EU or a power supply such as the DC Brick™.

CONTROLS

- 1 TONE knob controls the color of the distortion signal
- 2 OUTPUT knob controls overall effect volume
- 3 DISTORTION knob controls the amount of distortion
- 4 FOOTSWITCH toggles effect on/ bypass (white LED indicates on)

DIRECTIONS

- Run a cable from your guitar to the Prime Distortion's INPUT jack and run another cable from the Prime Distortion's OUTPUT jack to your amplifier.
- Start with all controls at 12 o'clock.
- Turn the effect on by depressing the footswitch.

- Rotate the OUTPUT control clockwise to increase the overall volume of the effect or counterclockwise to decrease it.
- Rotate the TONE control clockwise for a brighter sound or counterclockwise for a darker sound.
- Rotate the DISTORTION control clockwise to increase the amount of distortion or counterclockwise to decrease it.
